Practical 11: Jira Automation

A. Create an Automation Rule (Trigger → Condition → Action).
B. Configure rule (e.g., When issue is moved to Done → send email / auto-assign).

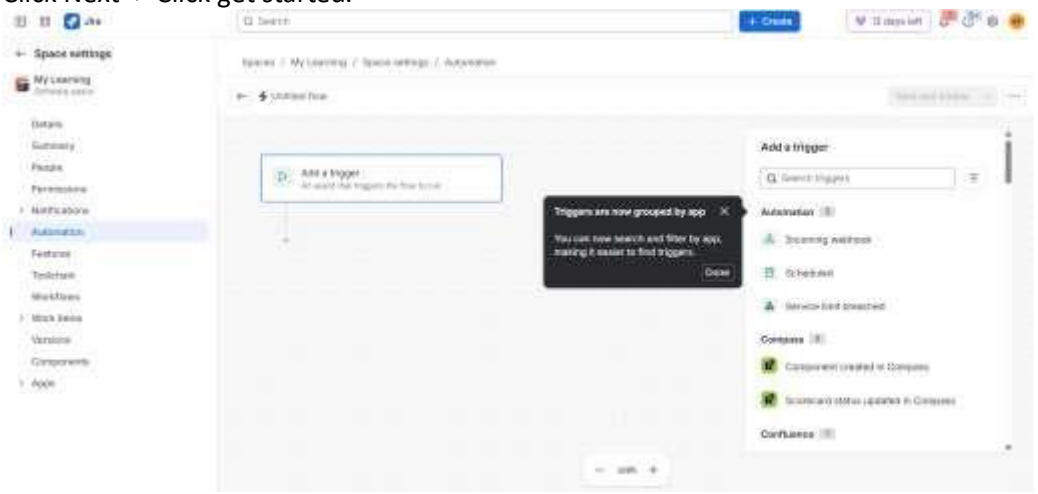

Open Project -> Click on top right of the project for Automation.

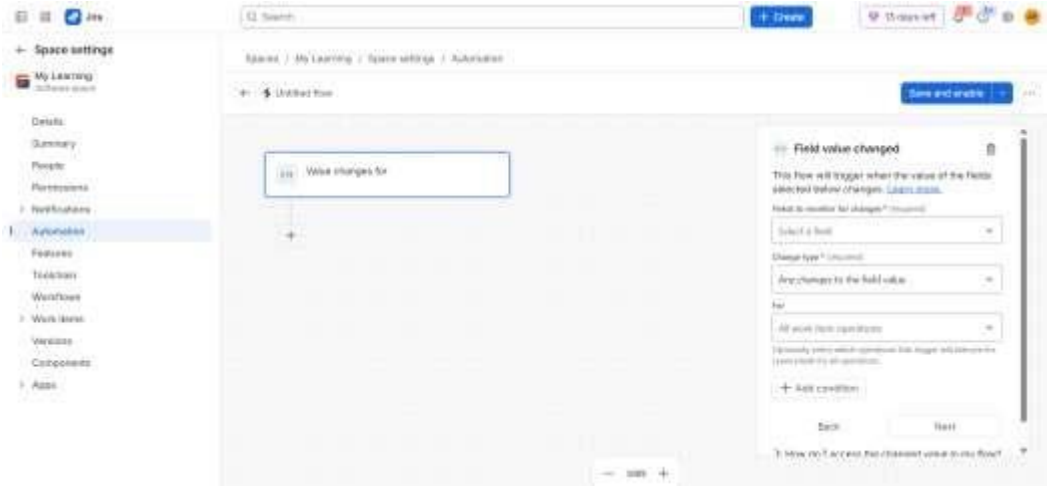

Click create Automation OR go to space settings -> Click Automation.

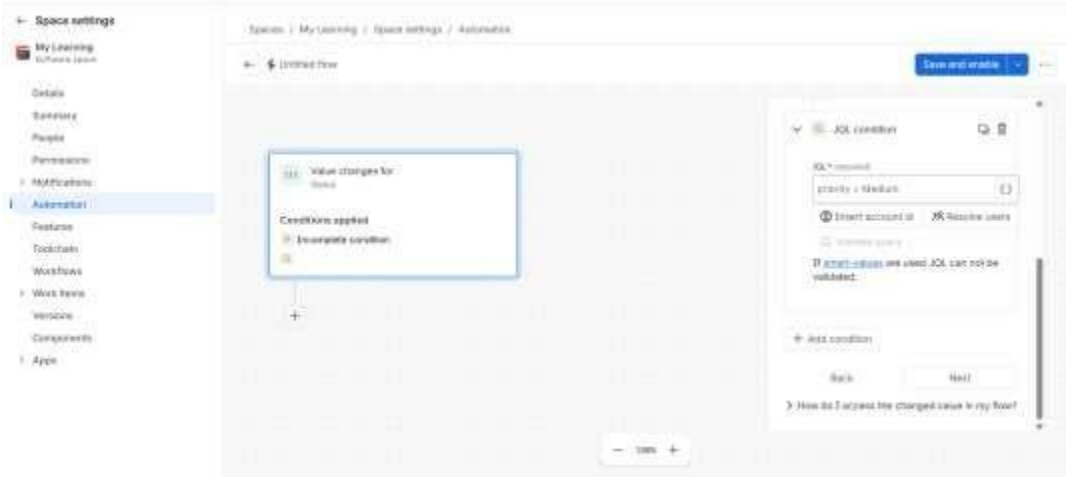

Click Next -> Click get started.

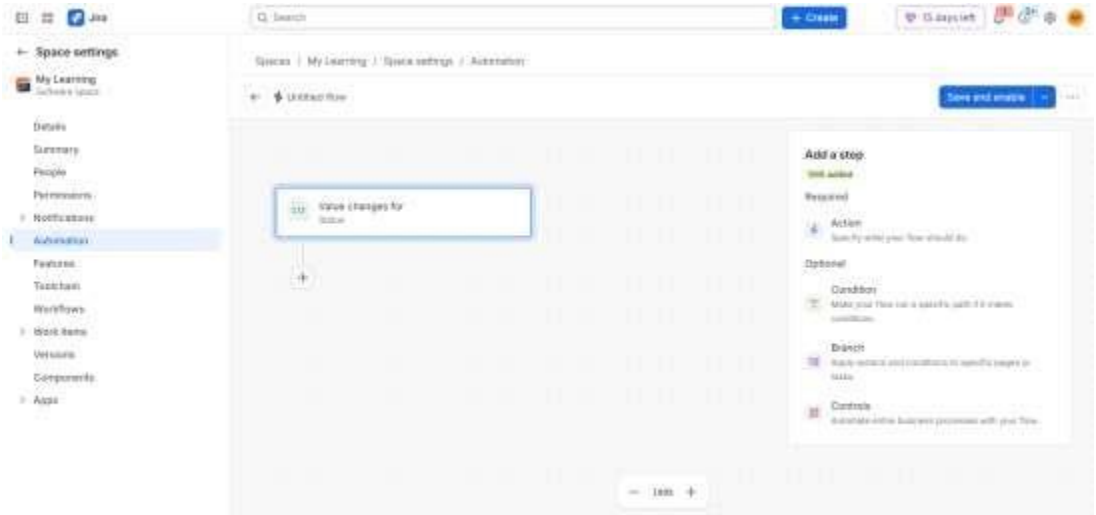

Add a trigger from the panel as Field Value Changed.
Enter details in field Value Changed.

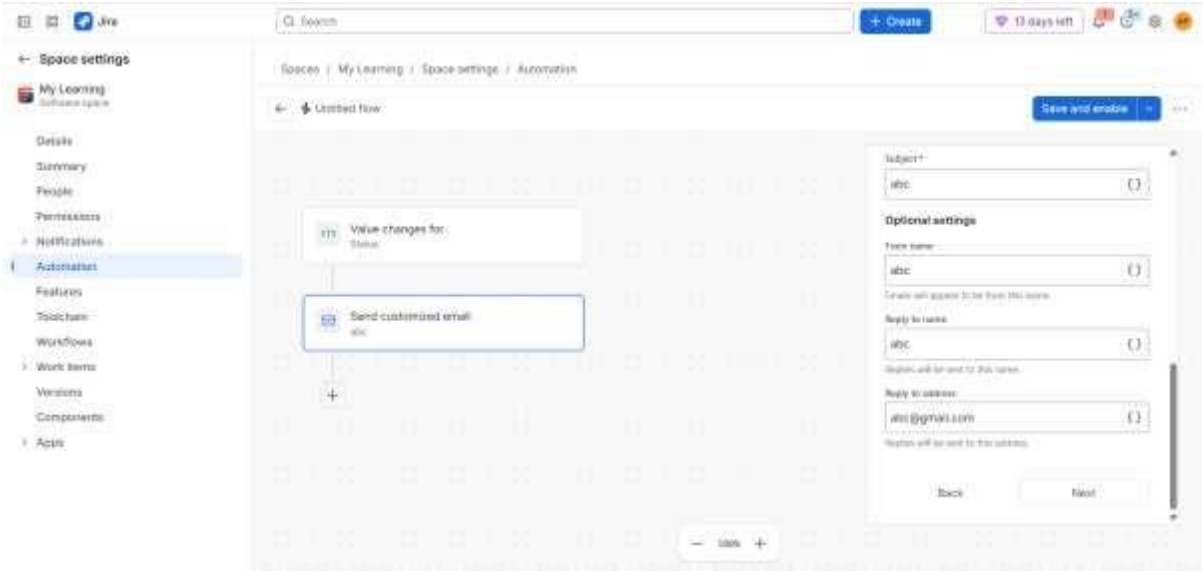

Then click Add condition and configure Work item in field condition.
Click Next.

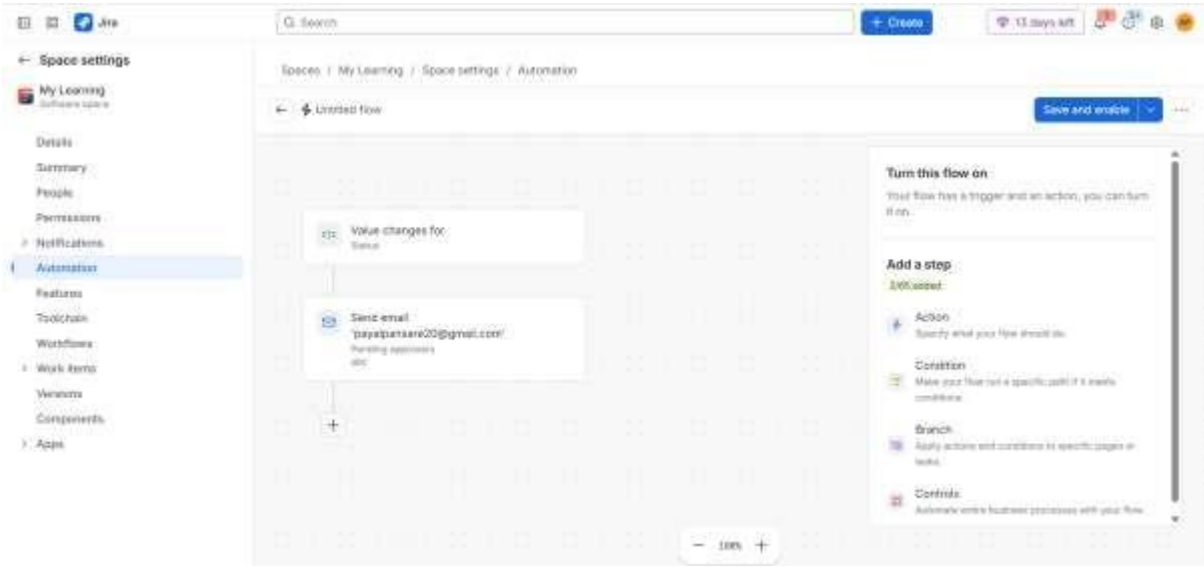

Click Action.

Select action as Send email.

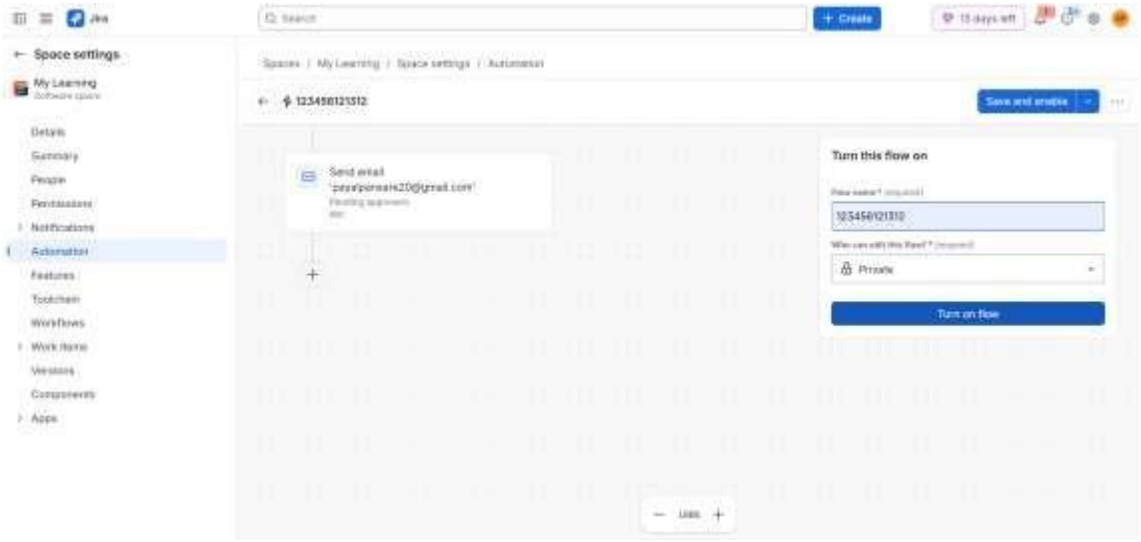

Click Next.

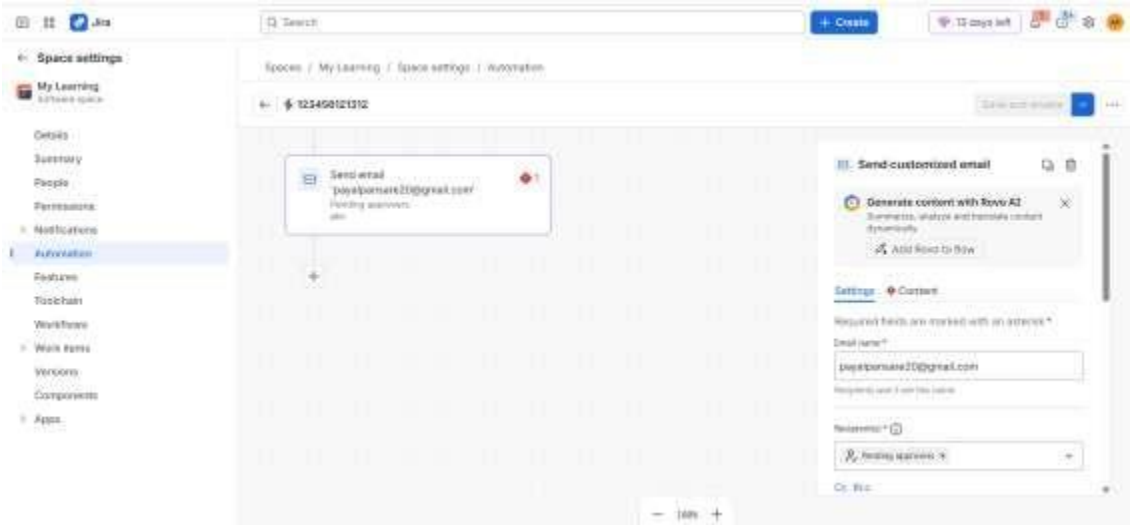

C. Test and enable automation rule.

Click Turn on flow -> Enter Flow name.

Click Turn on flow button.

As the task is complete, email is sent and received.
